ADDITIONAL INFORMATION

DESCRIPTION

- STELMAX 1985 is an easily applied PVC resin and tetrahydrofuran (flammable) solvent mix
- Readily to form maintenance free joints of exceptional strength

USE

- For joining all types of flexible and rigid PVC items
- Particularly suitable where bonding is only possible over small and narrow surface areas
- Manufacture of PVC window frames and other production assembly operations involving PVC components

MAIN FEATURES

- Adheres almost immediately on contact, dependant upon quantity applied and weather conditions
- The dry adhesive film has no smell
- Weathering, UV and chemical resistance is similar to good quality PVC

SHELF LIFE

- 135 g tubes - 6 months
- Store at temperatures between 5°C and 30°C

ADDITIONAL INFORMATION

DESCRIPTION

- STELMAX 1961/1965 are easily applied PVC resin, pigment and organic (flammable)
- Solvent mix filler adhesives which bond readily to form maintenance free joints of exceptional strength
- STELMAX 1961 has gap filling properties
- STELMAX 1965 has small gap filling properties

USE

- Gap filling adhesives for bonding rigid and plasticised PVC, and many coated metals
- Also good adhesion possible with many porous substrates
- Widely used in the window industry for frames and attachments

MAIN FEATURES

- Dry adhesive film has no smell
- Weathering, UV and chemical resistance is similar to good quality rigid PVC
- Solid content 40%
- Retains flexibility in use for long periods of time - sealed joints move with the substrate, and remain water and gas tight
- Good slump resistance

SHELF LIFE

- 300 g tube (Adhesive 1961) - 6 months
- 50 g tube (Adhesive 1965) - 3 months
- 132 g tube (Adhesive 1965) - 6 months
- Store at temperatures between 15°C and 30°C

## STELMAX Products

## Solvent Cleaner 1950

Description	Color	Weight kg	PU	Part Number
1000 ml bottle	Clear	1,0	1	9-C1950-1L-0-0

**ADDITIONAL INFORMATION****DESCRIPTION**

- This cleaning fluid is a combination of flammable solvents which has stronger action than the non-flammable mixture, for the cleaning of marked or heavily soiled PVC
- Can be used to dilute STELMAX products

**INSTRUCTION FOR USE**

- Apply a small quantity on a cloth, wipe stain area with quick, smooth strokes.
- Do not rub
- Do not leave cloth impregnated with fluid to rest on PVC. This will distort and soften the PVC surface

WEISS Products

Cosmofen Plus Adhesive

Description	Color	Weight kg	PU	Part Number
200 g tube	White	0,2	1	9-C9000-00-0-7
(With variable plastic jet cap)		5,0	30	9-C9000-30-0-7

\* = Color

PU = Packaging Unit

ADDITIONAL INFORMATION

DESCRIPTION

- Cosmofen Plus is suitable for quick and constructional bonding of PVC hard-materials like window profiles, gutters or pipes
- This PVC adhesive is extremely weather-resistant, because it contains ultraviolet stabilizer like the PVC Window profile

USE

- For welding of all types of flexible and rigid PVC products
- For corner repairs of PVC windows
- Can be used to bond 2 pieces of PVC together

MAIN FEATURES

- Adhere quickly on contact
- Weathering, UV and Chemical resistance is similar to good quality PVC

SHELF LIFE

- 6 months if store at temperatures between 5°C and 25°C

9-C9009-00-0-0

Key

Description	Color	PU	Part Number
Key for adhesive tube	White	1	9-C9009-00-0-0

ADDITIONAL INFORMATION

- Made of plastic
- Use for adhesive tubes

WEISS Products

9-C9002-00-0-0

Cosmoplast 500 Adhesive

Description	Color	Weight kg	PU	Part Number
20 g bottle	Clear	0,7	1 20	9-C9002-00-0-0 9-C9002-20-0-0
* = Color			PU = Packaging Unit	

ADDITIONAL INFORMATION

- Used for all gasket profiles, TPE and EPDM:
  - Butt and mitre joints in gaskets are quickly and permanently held
  - Universal application inside and outside

9-C9001-00-0-0

Cosmoplast 520 Adhesive

Description	Color	Weight kg	PU	Part Number
50 g bottle	Clear	0,7	1 10	9-C9001-00-0-0 9-C9001-5C-0-0
* = Color			PU = Packaging Unit	

ADDITIONAL INFORMATION

DESCRIPTION

- Cosmoplast 520 is a rapid bonding ethyl cyanoacrylate adhesive designed to complement the range of WEISS products used in PVC window industry

USE

- Formulated specifically for maximum strength bonding of EPDM and SPR rubber gaskets
- This product may be used to give quick bonding of many substrates including polypropylene and rubber foams

MAIN FEATURES

- Bond will form within 10 seconds, be careful because alignment is an important consideration
- Apply to one surface only

SHELF LIFE

- 6 months if stored in a closed upright container between 3°C and 20°C. The lower the temperature is the longer the shelf life will be

ADDITIONAL INFORMATION

DESCRIPTION

- These 2 special cleaners for window profiles on solvent basis are offered for different application of PVC cleaning intensity
- These cleaners are chlorinated hydrocarbons free and are not harmful for the health of users according to European standards.

USE - COSMOFEN 10 CLEANER

- This aggressive cleaner is slightly dissolving cleaner to be used on white PVC profiles
- It will remove marks and dirt on the PVC surface
- Can also be used to clean a surface before glue application

USE - COSMOFEN 20 CLEANER

- This non-dissolving mild cleaner with an anti-static agent is used to clean PVC surfaces or PVC profiles with foils
- It will clean dust, adhesives remainders from protection foils and labels and any other stains on the PVC surface
- The anti-static agent prevents the profile surfaces from getting dirty again

SHELF LIFE

- Store in tightly closed original casks, in a dry and ventilated area at temperatures from 15°C to 25°C without direct solar radiation
- Shelf time is 12 months
